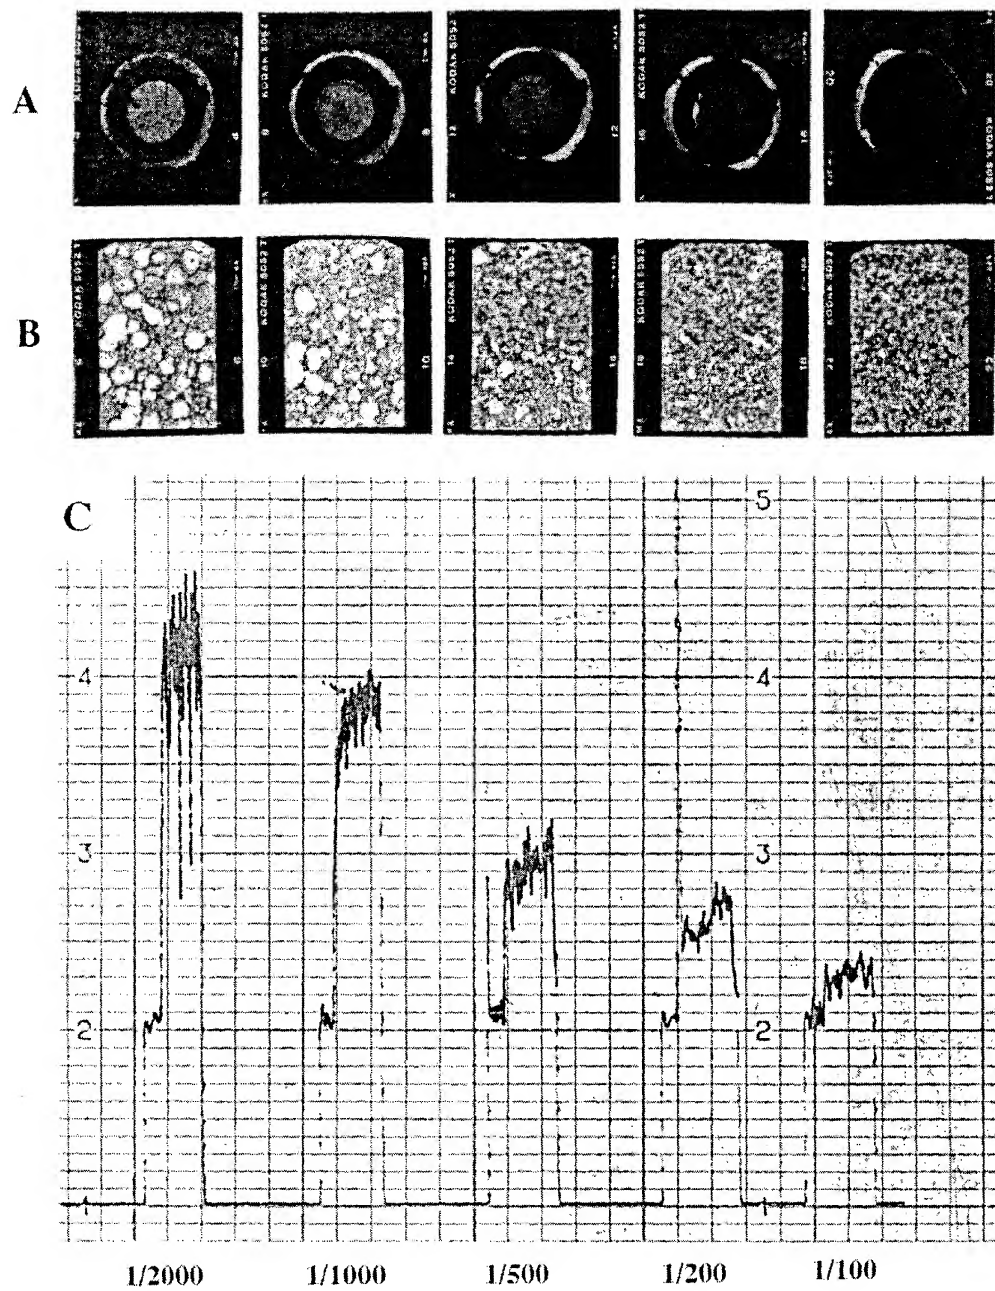

FIG. 8.3

A bar chart comparing the mean largest grain size (in mm²) across three categories: center, mid-sample, and edge. For each category, there are two bars: one with a dotted pattern and one with a shaded pattern. The y-axis ranges from 0 to 0.015 mm². The dotted bars are consistently low across all categories, while the shaded bars show a significant increase from center to edge.

category	dotted bar (mm²)	shaded bar (mm²)
center	~0.0015	~0.0108
mid-sample	~0.0015	~0.0100
edge	~0.0013	~0.0118
